Set of screw

**Inside Mount** - This is when you place the window in a window cove, window sil, or pelmet. The recommended width of the track is equal to the inside width of the cove, window sil, or pelmet  
Tip: Recommended Ceiling Brackets with No Finials.

**Outside Mount** - Generally mounted 6" above the window, the gather widths are recommended 25% of your window width giving a wider window experience. The length of the track is equal to the width of window + left & right gather width.
